Abstract of CN1178948

File layout change-over method makes it possible for electronic dictionary to share file resource in PCs or notebook computers, and various documents in PCs or notebook computers are first changed into one standard layout, which is then filtered and changed into layout for electronic dictionary. When used, the selected document is changed automatically and transmitted to electronic dictionary without need for the user to know the layout to be changed. The said method can speed file and information transmission and is convenient in use.
